

APPENDIX N

GP LETTER: Version 1, 1.9.05

(to be printed on hospital headed notepaper)

Dear Dr _____

Re: Patient Name, NHS Number, Date of Birth

Your patient has consented to take part in a research study of targeted screening for prostate cancer in high risk men. This involves doing an annual PSA test, taking other blood and urine samples, and completing a short questionnaire. The PSA test result and any other clinically relevant results will be conveyed to you in a separate letter after informed consent has been sought from your patient.

Please find enclosed a copy of the patient information sheet that outlines the rationale for this study. If you have any queries about this study, please write to or telephone us at the Royal Marsden Hospital (0207 808 2136).

Yours Sincerely,

(Contact details of local PI)
